

PARALLEL PARK GUIDE

During the whole manoeuvre remember to keep good observations, and stop if other traffic or road users increase the risk.

1. Drive along side of the vehicle to park behind. Leave and arms length distance between vehicles.
2. Check round and reverse straight until the passenger seatbelt pillar is at the back of the target car.
3. Turn the wheel anticlockwise ONE turn.
4. Reverse until your car is approx 40deg across the road and stop.
5. Turn the wheel clockwise ONE turn.
6. Reverse straight until the small triangle of visible road disappears from the passenger door mirror then stop.
7. Turn the wheel clockwise ONE turn.
8. Reverse back until the car draws parallel with the curb (This can be checked in the passenger door mirror.)
9. Turn the wheel anticlockwise ONE turn and then reverse straight back and stop when you can see the car in front's tyres on the road.

Reference points given above are for a **Ford Fiesta 2024**. These points may need adjusting when parking a different vehicle.
